

Memorandum

: Mike Padilla
Department of Conservation

Date : February 26, 1986

Subject: UIC Program

From : Department of Conservation — Division of Oil and Gas
Sacramento

As we have discussed, these tasks are to support ongoing activities of the UIC program.

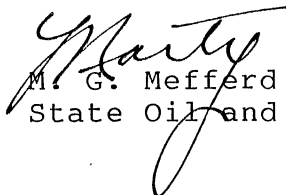

Determine which local water districts operate within and adjacent to the oil and gas producing areas (maps of oil and gas producing areas are available from the Division of Oil and Gas). Name, address, contact person, phone number, and a base map showing boundaries of the districts are needed.

Within these districts, locate water source wells and indicate whether they are used for drinking water, irrigation, or industrial supply. Also, indicate depth, thickness and lateral extent of the aquifers. Any water quality data that is available would also be helpful.

Identify land use in the area.

Question to ask the water districts - Do they reasonably expect to use water that contains a TDS of 3,000 mg/l to 5,000 mg/l and 5,000 to 10,000 mg/l?

If you have any questions regarding this project, do not hesitate to contact me or Bob Reid.

M. G. Mefferd
State Oil and Gas Supervisor

Memorandum

: District Deputies
Section Managers

Date : February 25, 1986

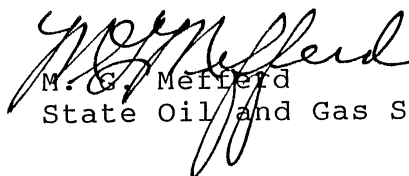

Subject: Underground-Injection
Surveillance

From : Department of Conservation — Division of Oil and Gas
Sacramento

This is to confirm that the following decisions concerning our UIC program were made at the February 20-21 Deputies' Conference:

- The approval for an injection project is to be rescinded if that project has been idle for a continuous period of two years. Reactivation of such project may require a full project-application review, at the discretion of the district deputy.
- The permit for a disposal well may be rescinded if the annual survey is not conducted on schedule.

These policies are effective immediately, and will be incorporated in the Manual of Instructions.

M. G. Merfeld
State Oil and Gas Supervisor
